PROFILE

Full-stack developer and GoHighLevel-certified automation specialist who builds and ships systems end to end, from client CRM and workflow automation to AI-driven WhatsApp sales agents and production web platforms. Combines hands-on development (Next.js, FastAPI, PostgreSQL) with GHL, Make, Zapier, and AI/workflow automation to help businesses streamline lead capture, onboarding, and marketing operations.

PROFESSIONAL EXPERIENCE

GHL Certified Admin / Automation Developer / 2025 - Present

- Earned GoHighLevel Certified Admin and Conversation AI certifications; built CRM and workflow-automation systems for client businesses across multiple industries, incl. Custom Objects for multi-entity data models.
- Designed a multi-cohort reporting dashboard (Custom Objects & Custom Metrics) for a workforce-development program; wrote the functional specs, praised by program instructors.
- Built a membership access-control workflow with live Stripe integration, and a Shopify-to-GHL purchase automation pipeline syncing customer/order data and triggering follow-up sequences.
- Set up a Conversation AI lead-capture automation for a coaching-business client; selected into the program's paid phase after a standout Custom Objects build among a 23-person cohort.

ICT Technical Assistant / Full-Stack Developer INIESAT / Sept 2024 - Present

- Led development of the institution's official web platform (Next.js, Supabase) with secure authentication and a PostgreSQL backend.
- Built database-backed candidate and enrolment data export tooling, improving administrative efficiency for enrolment processing.
- Provided ongoing user support and built a responsive, mobile-first frontend (Bootstrap), improving enrolment visibility and engagement.

PROJECTS

StarterPay *Personal project* / 2025

- Engineered a middleware layer (Next.js) simplifying mobile-money payment API integration for student developers in Cameroon; submitted a formal partnership proposal to CamPay and applied to the Mountain Hop PawaPay Builders Sprint to validate the model.

WACRM / Nova - WhatsApp AI Sales Agent *Personal project* / 2025

- Built a self-hosted WhatsApp AI sales agent (Node.js, Baileys, DeepSeek API) for wholesale/retail sellers in Cameroon, with bilingual French/English prompt design and a routing layer separating personal and business contacts.
